## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

The amendment 4-7-2006 is acknowledged. Claim 1 has been amended. Claims 1-5, 7-17 and 19 are pending and currently under examination.

### ***Claim Rejections Withdrawn***

The rejection of claim 1 under 35 U.S.C. 112, second paragraph, as being rendered vague and indefinite by the use of the term “therethrough” is withdrawn in light of the amendment thereto.

### ***Claim Rejections Maintained***

#### ***35 USC § 112 – New Matter***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

The new matter rejection of claims 1-5, 7-17 and 19 under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention is maintained for reasons of record

#### **Applicant argues:**

1. The amended language, albeit in a varied form, appears on page 17 of the specification.

Art Unit: 1645

2. Applicant believes that the limitation is fully supported with respect to the use of deoxycholate as the ionic surfactant and those of skill in the art would recognize that other ionic surfactants would behave in a manner consistent with that demonstrated with deoxycholate. Applicant's arguments have been fully considered and deemed non-persuasive.

With regard to Points 1 and 2, the specification on page 17, deals specifically with the use of deoxycholate and contrary to Applicant's assertion, does not provide support for ionic surfactants in general. The specification provides no disclosure showing that claimed percentage was contemplated with regard to any ionic surfactant other than deoxycholate.

As outlined previously, Applicant has amended claim 1 to recite, "wherein after this step the amount of ionic surfactant remaining in said solution is less than 0.002%...". This phrase does not appear in the specification, or original claims as filed. Applicant indicates that support for the new limitation can be found at page 17, first full paragraph. While the disclosure at page 17 does teach a surfactant concentration of less than 0.002%, said limitation is disclosed only in the context of isolation of HA utilizing deoxycholate. Said disclosure is insufficient to support the claimed surfactant concentration for surfactants generally. It should be noted that the disclosure of specific limitations, in specific examples, cannot be lifted from said examples and included in more generic method claims i.e. specific disclosures do not necessarily provide support for generic claim limitations.

### ***Conclusion***

No claim is allowed.
